

State Charts

—

System Design - Behavioral

Event-driven modeling

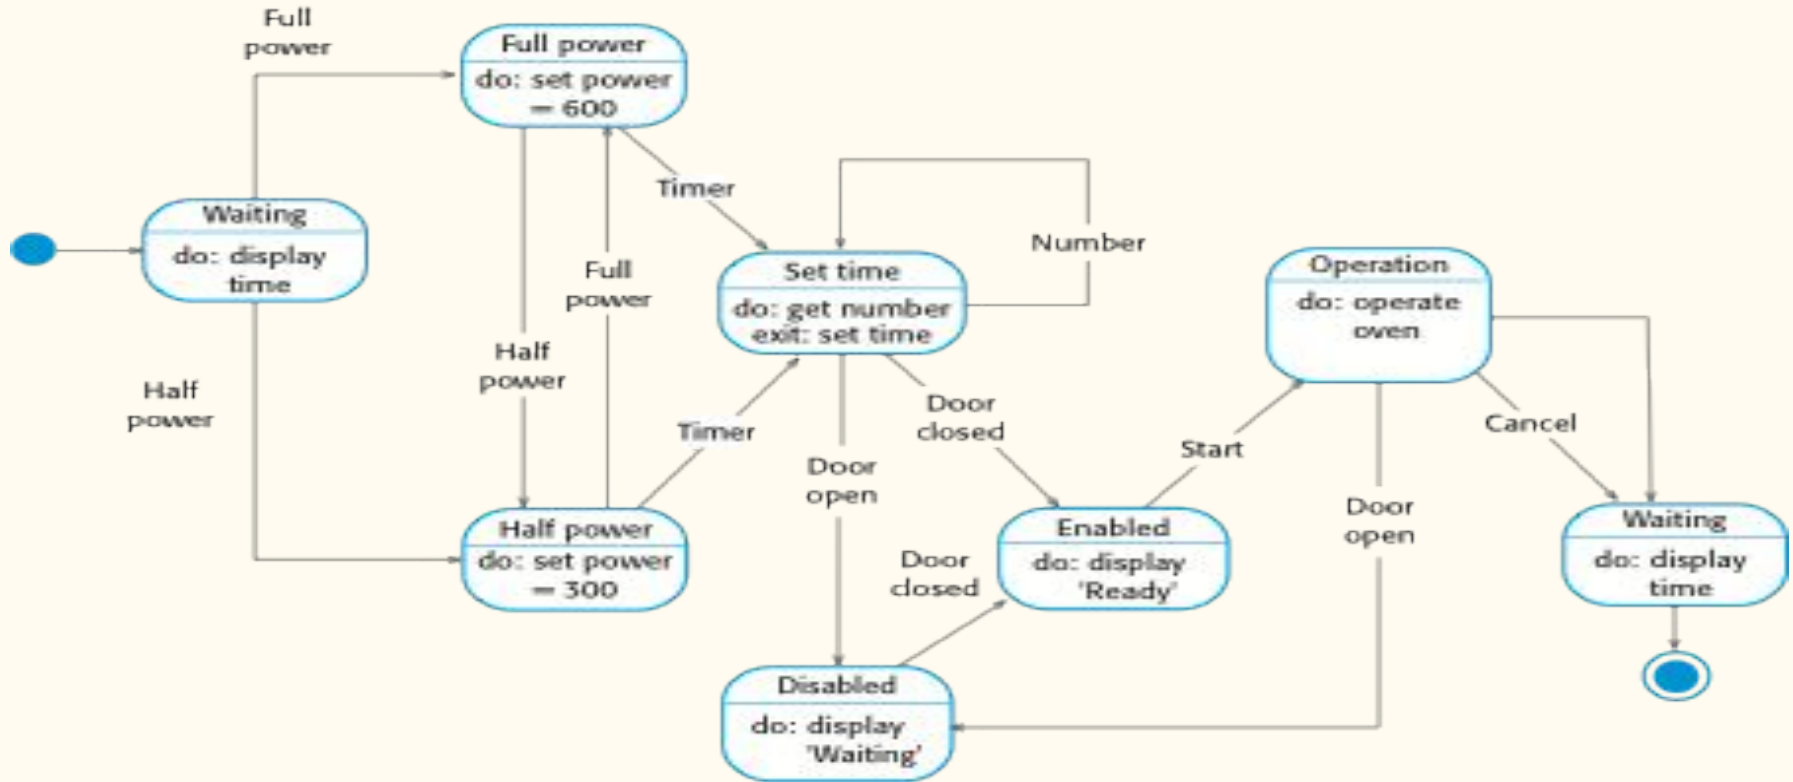

- How system responds to external and internal **events**.
- System has a finite number of **states**
- Events cause a **transition** from one state to another

Statecharts: State models

- States are represented as nodes
- Events are represented with arcs between nodes
- When an event occurs

the system moves from one state to another

State diagram of a microwave oven

States for the microwave oven

State	Description
Waiting	The oven is waiting for input. The display shows the current time.
Half power	The oven power is set to 300 watts. The display shows 'Half power'.
